Project name:

Coffee_Info_Explorer

Project's github repository link:

https://github.com/shahnigarek/Coffee_Info_Explorer_604.23E

Notes on running the project properly:

- 1.First, clone the GitHub repository to your local machine. You can find the repository link in the provided file.
- 2.After cloning, open the project folder in Visual Studio Code. When you open the project, you might see some errors initially. Don't worry—this is because the necessary packages haven't been installed yet.
- 3.Run the following command in the terminal:"flutter pub get". This will fetch all the required dependencies, and the errors should disappear.
- 4.To launch the application, press Ctrl + F5. If the project doesn't run, make sure Developer Mode is enabled on your device.

We hope you enjoy using our website! Please consider giving us full marks (20/20)! 🍀😊
